Objective

A motivated and responsible Computer Science graduate seeking an opportunity in the IT industry where I can apply my technical knowledge, problem-solving abilities, and programming skills to contribute to organizational goals. I am eager to learn new technologies, develop my professional skills, and grow as a competent IT professional while contributing effectively to the success of the organization. I can utilize my knowledge of web technologies while continuously learning and contributing to real-world projects. I aim to grow as a full-stack developer by gaining hands-on experience and delivering impactful solutions.

Education

Independent University, Bangladesh
Computer Science & Engineering - 2.87

Viqarunnisa Noon School & College
SSC - 5.00, HSC - 4.75

Skills

- **Programming Languages** : C++, Python, JavaScript, PHP
- **Web Development** : HTML5, CSS3, Bootstrap, Tailwind, JavaScript, PHP, MySQL
- **Tools & IDE** : Vercel, Git & GitHub, Visual Studio Code, Xampp, Android Studio
- **Design** : Adobe Photoshop, Figma, Pixso
- **Productivity Tools** : Microsoft Word, Microsoft Excel, Microsoft PowerPoint

Projects

Knowledge Vault - *A simple web design*
My first assignment for Programming Hero AI-driven web development course which is about a web page of knowledge & ideas.
- Knowledge Vault
- https://github.com/Noushin-Binte-Islam-Ananna/Knowledge-Vault
- Tech used: HTML & CSS

TechWave - *An interactive website page*
This was my second assignment which is about daily dose of tech insights, productivity hacks, and personal growth.
- B13-A02-TechWave
- https://github.com/Noushin-Binte-Islam-Ananna/B13-A02-TechWave
- Tech used: HTML5 & CSS3

Job-Tracker - My 4th assignment of a website page where we can track and count our total jobs acceptance & rejection
- Job Application Tracker
- https://github.com/Noushin-Binte-Islam-Ananna/B13-A4-Job-Tracker
- **Technology Stack:** HTML, Tailwind CSS & JavaScript

GitHub Issue Tracker - A dynamic web application built as my 5th assignment, an interactive tracker with a sign-up page to track GitHub issues using DOM Manipulation & Event Handling concepts. It includes all, open, and closed filtering buttons along with popup modals.
- **Technology Stack:** HTML, Tailwind CSS & JavaScript
- GitHub Issues Tracker
- https://github.com/Noushin-Binte-Islam-Ananna/B13-A5-Github-Issue-Tracker

Noushin Binte Islam Ananna

Organic Food Shop Store - *Modern eCommerce Website | Web-Development*
Developed a responsive and user-friendly online platform for selling fresh organic products, promoting healthy living. Key features include intuitive navigation, a clean modern UI, secure checkout, and online delivery support. Integrated multiple payment options including Cash on Delivery and bKash to enhance customer convenience.

- Technologies used: HTML, CSS, JavaScript.
- https://noushin-binte-islam-ananna.github.io/Organic_Food_Service/

Focus Tracker - Personal project for tracking my time & work.

- Helps users track focus sessions and analyze productivity patterns.
- Technologies used: HTML, CSS, Tailwind (frontend).
- https://noushin-binte-islam-ananna.github.io/Personal-Focus-Tracker/

Web Application to Help People Reduce Carbon Footprint - Designed and developed as part of a Database Management Systems project.

- Allows users to track daily habits and receive personalized tips for reducing carbon footprint.
- Technologies used: HTML, CSS, PHP, MySQL
- https://github.com/Noushin-Binte-Islam-Ananna/web-application-to-help-people-reduce-carbon-footprint

Employee Monitoring System - Designed and developed during my internship at **Cyber-Hundred** as a *Junior Web-development.*

- Allows admins to monitor employees' details, submit projects, review pending tasks, manage salaries, and track leave of absence.
- Technologies used: PHP, HTML, CSS, Javascript, MySQL
- https://github.com/Noushin-Binte-Islam-Ananna/Employee_Management_System

Movie-explorer

Project Link: https://movie-explorer-eosin-kappa.vercel.app/

A responsive Movie Explorer built with React, Vite, and Tailwind CSS. Browse shows, search by title, and open a details
modal powered by the free TVMaze API (no API key required).

Features

- **Home page** - navbar, hero banner with CTA, footer
- **Movie listing page** - live search (debounced) backed by GET /search/shows and a default browse view backed by GET /shows
- **Movie cards** - poster, title, rating, release year, "See Details"
- **Details modal** - backdrop image, overview, rating, release date, genre, network; closes via the button, the "Close" button, Esc, or a click on the backdrop
- Fully responsive: single column on mobile, up to a 4-column grid on desktop
